

## **SEXUALLY TRANSMITTED INFECTIONS**

You will be doing research on a Sexually Transmitted Infections (STIs). Using the recommended electronic resources and the Web sites provided for you on the library's health and phys. ed. page, include the following information about the infection you have been assigned:

General Information (History)

Transmission

Symptoms

Effects

Treatment

Prevention

Current Statistics

You will only need to write a paragraph or two on each subtopic.

Once you locate information:

1. Print the entire Web page/article (if you are using a print resource, photocopy the title page and the back of the title page as well as the pages you use).
2. Highlight the important information
3. Take notes **IN YOUR OWN WORDS** and indicate which resource the information you are paraphrasing came from. There is a zero tolerance for plagiarism. Type *your* paragraph(s) into a Word document. You may divide the document using the subtopics from the list above.
4. Try to use as many different resources as you can.

You will have 2 days in the library to complete this part of the assignment.
