

Magical Moments from Mrs. Marcucci's Class

First Graders Are Learning...

This week the children practiced correct letter formation using their new white boards and Expo markers that are used for spelling practice.

We had our first **Bus Drill**. The children learned about the Emergency Exits as well as safe crossing.

We watched a video in library showing how crayons are made at the Crayola Factory.

This week we began our journey through the **Northeast**. The children located **Maine** on their **maps** of the U.S. and learned a few facts about the state.

At the Science Lab. we used our sense of smell to decide whether real fruit or fruit stickers smelled best.

The children learned that every word must have a **vowel**. They enjoyed finding the **vowels** and **consonants** in their names.

Reminders:

If you are having trouble locating **pink** and **blue** index cards don't worry. We have enough to get started. When you do find them, please send them in. You will need the Index Card box for home storage as the cards start coming home. Thank You!

We just found out that if your child wants something on a bagel that usually comes on bread like turkey, tuna, bologna, cheese or peanut butter and jelly it cost \$.50 more.
